

## The Cumberland School Curriculum

### Key Stage 3

During Year 7 and Year 8 pupils will follow a balanced curriculum. They will study the following subjects: English Language and English Literature, Maths and Statistics, Combined Science, History, Geography, Religious Studies, Computer Science, Physical Education, Design Technology, Food Technology, Art, Music and Drama. Pupils will study a PSHE and careers programme during their mentoring sessions, which run three times a week, along with Smart Skills.

### Key Stage 4

During Year 9 to 11 pupils will continue to follow the core subjects: English Language and English Literature, Maths and Statistics, Combined Science or the Separate Sciences of Biology, Chemistry and Physics and Religious Studies and Physical Education. Pupils will then study three additional qualifications: History and/or Geography, French or Spanish and a further subject from: Art, Digital Photography, Drama, Music, Design Technology, Computer Science, Business Studies, Health & Social Care, Physical Education and Sociology.

All Key Stage 4 pupils continue with the mentoring programme three times a week, covering Smart skills, literacy, PSHE and careers.

We run a foundation programme alongside the curriculum to support pupils who have specific learning needs and an ESOL programme for pupils who are new to speaking English. Pupils with an additional language will also have the opportunity to complete a GCSE in Year 10, where that language is available as a GCSE.
